

Client Objectives:

Twincraft was founded in 1972 by twin brothers Bob and Dave Asch and has been a successful business ever since. Located in Vermont, Twincraft produces roughly 800 different SKUs annually, yielding roughly 45 million soap and skincare units.

- Be a leading “green” manufacturer of skincare products
- Lower carbon footprint and reduce their impact on the environment
- As a member of their community, Twincraft aims to be an industry leader in sustainability

Our Solution:

SolarSense developed a 500 kW fixed tilt ground mount group net-metered solar PV electric generation facility in Vermont to provide a percentage of electric needs.

- Solar System Description: 656.64 kW DC ground mounted Solar PV system comprised of; Canadian Solar 320 watt modules, RBI Solar driven pile racking, SMA string inverters
- Business Model: 20 year Power Purchase Agreement

Benefits:

- \$0 out of pocket capital for Twincraft Skincare
- Predictability in electricity costs for 20 years
